

New Product Announcement

For Immediate Release

May 2009, Minneapolis, MN

The RockKit® Grout Gun from Zero5 Innovations is the Ultimate Weapon for Grouting and Tuckpointing.

Zero5 Innovations announces the release of the RockKit® Grout Gun, a user friendly grout application tool. By incorporating a semi-rigid tip, grout is applied to joints similar to conventional caulking methods in that you smooth the grout joint as it is applied. This allows you to apply the mortar in one step, unlike grout bags where twice the amount of material as needed is applied and later removed when it starts to set up.

Loading the RockKit® is fast with a hinged barrel that swings down to allow the use of a scoop. The barrel can also be detached in a split second and then replaced with a fully loaded barrel so production never has to stop.

The unit is engineered to survive the abrasiveness of concrete by being made from super light weight T6 aluminum, the strongest aluminum available, then further strengthened by anodizing. Professional installers admit that placing the rock is the fun and easy part. Grouting is the hard part and it is the determining factor in the overall appearance of the project. Whether you are installing manufactured stone, cultured rock, natural rock veneer, stone tile, thin brick or simply tuckpointing old brick, with the RockKit® everyone can have professional results.

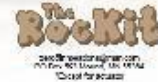

The Ultimate Weapon for Grouting & Tuckpointing

- Faster Loading
- Larger Capacity, 1.6 Qts.
- Ergonomically Correct
- Greater Accuracy
- Less Residue on Rock
- Quick Cleanup
- Consistent flow control for precise grout placement
- No more hand fatigue or cramping so you can work in comfort, longer
- No drip, seal containment unit means you can set it down full
- Less grout on the stone for easier clean up and better quality project
- Engineered to last a lifetime

Manufactured by

The RockKit® and a full line of accessories can be found at www.zero5innovations.com. For more information call 866-Z5 ROCKKIT or email rockit@zero5innovations.com.
